

How to administer Casozen?

The daily dose is 1 capsule per 200 ml of drinking water.

Open the capsule and mix the Casozen powder into 200 ml of drinking water.

Change your bird's drinking water daily.

Casozen is suitable for long-term use as a natural supplement.

Give your ornamental bird the rest it deserves, day after day.

CASOZEN

TAVC bv

Calming supplement for parrots
and large parakeets

Developed by and with veterinarians

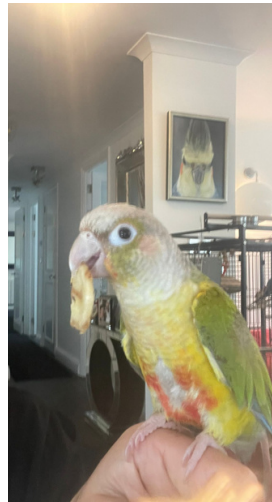

Have you recently moved, is your bird home alone for long periods or has it moved to a busier environment ?

Various conditions impact your pet's stress levels.

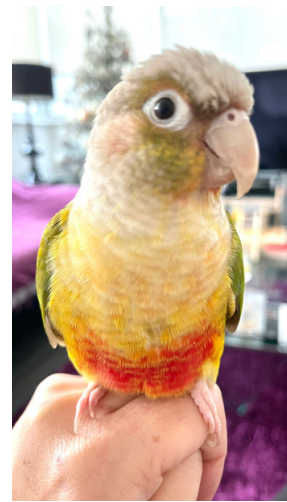

Calm your ornamental bird down to every feather

Simply administer a daily Casozen capsule in the drinking water of your ornamental bird.

This way, you will calm him down, which will have a significant impact on his wellbeing.

BEFORE

AFTER
1 treatment cycle of 30 days

BEFORE

AFTER
2 treatment cycles of 30 days each.

Casozen capsules

- 100% natural
- immediate effect
- no side effects
- easy to administer
- developed by veterinarians

Do you notice this behaviour in your ornamental bird ?

- aggression
- feather picking
- stress
- separation anxiety
- noisy
- behavioural changes

"A Casozen treatment reduces stress and can stop feather picking behaviour in some cases."

DVM E. Demeester - Medibird
